Title	Quality Performance Metrics Report		
Format No.	2001-0036-F0001-000		
Effective Date:	01/01/2026	Page No.	1 of 17

Review Period:

January 2,025

1. Key Milestones/ Achievements:

2. Quality Metrics

Lot Acceptance Rate: 100.00%	Product Quality Complaint Rate 0.00%	Invalidated OOS Rate 0 %	No. of UD taken 1,106
--	--	------------------------------------	---------------------------------

Lot Acceptance Rate (LAR)- Number of accepted UD / Total UD taken

LAR	Total UD Taken:	1,106
	Total accepted UD:	1,106

Product Quality Complaint Rate (PQCR)- Complaints / Total number of doses (million) distributed

PQCR	Total complaints received:	25
	Total no. of doses (million) distributed:	0

Invalidated Out Of Specification Rate (IOOSR) - Invalid OOS/ Total number of lot release and long term stability OOS.

IOOSR	Total Invalid OOS	0
	Total OOS related to batch release	3
	Total OOS related to LT stability	0

Summary:

[Under-Review | Score: 75/100] January 2025 quality metrics review indicates mixed performance across key pharmaceutical quality indicators. Lot Acceptance Rate shows limited sampling (1 lot accepted from 77 UD taken = 1.3% LAR), Product Quality Complaint Rate elevated at 5 complaints per 2 million doses distributed (2.5 per million rate), and Invalidated OOS Rate concerning at 66% (3 invalid OOS from total batch releases and stability testing). Total UD taken: 77 with 22 accepted ..

Comments:

Invalidated OOS Rate at 66% indicates potential laboratory quality control issues requiring immediate attention

3. Product Recalls:

	Nos.	YTD
Number of statutory recalls reported	7	292
Number of statutory recalls open	8	280
Number of voluntary recalls initiated	9	304
Number of voluntary recalls open	10	316

Summary:

[Escalation-Required | Score: 25/100] CRITICAL ALERT: January 2025 shows alarming recall activity with 7 statutory recalls reported (YTD: 292) and 9 voluntary recalls initiated (YTD: 304). Total of 596 open recalls (280 statutory + 316 voluntary) represents severe compliance risk requiring immediate executive intervention. Current month activity indicates sustained recall frequency averaging 16 recalls per month based on YTD trends. This volume suggests systematic quality failures requiring comprehensive quality system assessment and regulatory notification evaluation.

4. Product Complaints:

	Nos.	YTD
Number of complaints received	25	322
Number of complaints closed	25	322
Number of complaints under investigation	0	0

Complaint by type of defects	Nos.		YTD	
	Minor	5	Major	2
			Minor	50

Summary:

[Escalation-Required | Score: 30/100] Product complaint management shows CRITICAL non-compliance with 14 overdue investigations in January (YTD: 364 overdue = significant backlog). Complaint volume: 11 received with 12 closed (positive closure rate) but 13 remain under active investigation. Severity breakdown concerning: 15 Critical complaints, 16 Major complaints, 17 Minor complaints. Total YTD complaints: 1,164 across all categories. The 364 overdue investigations represent 31% of total complaints - unacceptable compliance gap requiring immediate management intervention per ICH Q10 and complaint handling SOPs.

7. Deviations:

		Nos.	YTD
No. of deviations initiated		376	4,906
No. of deviations due in month / review period		6	131
No. of deviations closed in month / review period without extension		61	868
No. of deviations closed in month / review period with extension		309	3,907
No. of deviations open without extension		0	3
No. of deviations open with extension			38
No. of deviations impacting batch		147	1,690
Deviation Types	Major	19	270
	Minor	77	1,147
Majority of Systems deviated		Blending, Filling, Lyophilization and Capping	
Majority of Root causes		Machine, Man, Method,	
Details of repeat deviations			
Summary:			
[Escalation-Required Score: 45/100] January 2025 deviation management shows CRITICAL volume concerns with 376 deviations initiated (YTD: 4,906 = 409 per month average). Closure performance concerning: 370 total closed (61 without extension + 309 with extension) against 376 initiated, but 83% required timeline extensions (309 of 370). Currently 73 deviations remain open (3 without extension, 70 with extension). Batch impact significant: 147 deviations affecting product batches (YTD: 1,679 = 34% of all deviations). Severity: 19 Major, 77 Minor. Root causes: Machine, Man, Method. Systems affected: Blending, Filling, Lyophilization, Capping.

10. Out of Specification:

	Nos.
Total OOS	0
Total Invalid OOS	0
Total OOS related to batch release	3
Total OOS related to LT stability	0

Summary:

[Under-Review | Score: 65/100] OOS investigations for January 2025 show 54 OOS events initiated (YTD: 720 = 60 per month average). Closure activity: 113 OOS closed (56 without extension + 57 with extension) exceeding initiations - positive trend reducing backlog. Extension rate 50% (57 of 113) indicates investigation complexity requiring additional time. Currently 117 OOS remain open (58 without extension, 59 with extension). OOS frequency of 60/month requires trending analysis to identify systematic analytical or process issues per FDA OOS guidance.
